To whom it may concern:

The student Taisiia Mos, has been working under my supervision during her Erasmus stay at the University of Córdoba in the June 15<sup>th</sup>- September 15<sup>th</sup> period, 2023. She has been carrying out research activities on honey quality in the Department of Food Science and Technology of the University of Cordoba.

This activity consisted of an experimental design for determination of specific rotation in honeys. Taisiia has participated in the whole experiment having intervention in its design, sample preparation, analyzing and interpretation of results. She has assisted all work with interest and professionalism. Her knowledge of scientific fundamentals, laboratorial skills and English language are so adequate, also her open character and courtesy have made a pleasure to work with her.

During September Taisiia has been writing a draft for a scientific publication, getting a very good bibliographic revision and comments on it. She stands out for her speed at work and big responsibility.

Signed in Córdoba, September 19<sup>th</sup>, 2023

Salud Serrano  
Professor of Food Inspection and Control
